+919971998083 goyalsomil2001@gmail.com [linkedin.com/in/somil-goyal/](https://www.linkedin.com/in/somil-goyal/)

Education

Vellore Institute of Technology, Vellore

July, 2019 – April 2023

Bachelor of Technology, Computer Science and Engineering

CGPA: 8.53/10

Experience

ZEE ENTERTAINMENT ENTERPRISES LTD

June 2023 – March 2024

Associate Software Development Engineer

Bangalore, Karnataka

- Revitalized profiles and settings(user and profile level) services in ZEE5 using **Vert.x, Syclla DB**.
- Led the comprehensive testing phase to ensure functionality and reliability, subsequently transitioning the service to production with seamless integration.
- Implemented a robust third-party API integration service leveraging **SpringBoot, Postgress** aimed at seamless removal of user details from internal and external services across the ZEE5 platform.
- Significantly contributed to scalable backend design using Node.js, Java, Vert.x and Spring Boot.
- Engineered and implemented innovative features across a range of existing services, aimed at enhancing the overall user experience by **20-50 percentage**.
- Streamlined bug fixes for **AWS to GCP migration** and managed CI/CD pipelines for continuous integration and deployments.
- Utilized Git for version control, ensuring smooth collaboration and efficient code management.

Internship

Bridge Healthcare Pvt Ltd.

February 2022 – May 2022

Web Developer

Remote

- Designed and developed the client-side of a Health Booth website utilizing HTML, CSS, and JavaScript technologies.
- Developed system in a way to cater to the needs of both doctors and patients, with distinct interfaces tailored to their respective roles and requirements. Each user group benefits from specialized functionalities optimized for their tasks and interactions within the platform.

Projects

Online Skin Consultation | *HTML, CSS, JavaScript, MySQL, PHP, RASA*

- * Spearheaded the development of an innovative online platform for skin consultation and disease prediction, streamlining access to healthcare for patients with minor skin concerns, reducing the need for hospital visits.
- * Employed a versatile tech stack including HTML, CSS, JavaScript, PHP, SQL for database management, coupled with advanced technologies such as RASA(framework of python) for chatbot creation, and Google's Teachable Machine for the implementation of a precise skin disease detection algorithm, ensuring comprehensive and effective patient care.

E-COURIER SERVICE | *HTML, CSS, JavaScript, MySQL*

- * Developed a web based courier system which supports the high accessibility of courier services to the companies and to the customers and improves efficiency by 10 to 30 percentage.
- * Implemented a comprehensive system empowering users to access and monitor their shipments via unique randomly generated IDs. Users retained the flexibility to adjust shipment addresses and cancel orders as required.
- * The administrators were equipped to update shipment statuses and input vital details like priority, fragility, and package categorization to furnish estimated shipping times. Moreover, administrators could evaluate the viability of establishing new branches based on geographical considerations and specific requests.

Employee Management | *Java, Visual Studio Code, SpringBoot, MySQL*

- * Designed and implemented a prototype employee management system using Java to streamline organizational processes and improve efficiency by 40 percentage. Leveraged the Spring Boot framework to facilitate essential functionalities including adding, updating, and deleting employees. Additionally, incorporated features enabling users to efficiently search for employees based on various categories such as department, ID, and location.

Certificates

- Robotics for Industries and MSMEs by National Board for Quality Promotion (NBQP) and Training and Capacity Building Cell (TCB), Quality Council of India(QCI)
- Data Structures and Algorithms by University of California San Diego (UCSD)

Technical Skills

Languages: Java, Node.js, HTML/CSS, JavaScript, MySQL, PostgreSQL, Python, GraphQL

Developer Tools: Apache Kafka, VS Code, Eclipse, IntelliJ IDEA

Technologies/Frameworks: GitHub, SpringBoot, Vert.x, Spanner

Additional Skills: Documentation and Reporting, Ticketing Systems (e.g., JIRA)
