ESG Dashboard Report

Environmental, Social & Governance Performance

Reporting Framework **Internal / BRSR**	Generated On **August 3, 2026**
Reporting Period **Apr 2026 - Mar 2027**	Prepared By **SustainRepo**
Reporting Frequency **Monthly**	Report Version **1.0**

CONFIDENTIAL

Executive Summary

Environmental Highlights

- Total emissions reached 1,207.04 tCO2e.
- Renewable energy contributed 88.8% of total energy consumption.
- Water recycling remained strong at 5,720.72 KL.

Social Highlights

- Workforce remained stable with 470 employees.
- Employee turnover data not available.
- LTIFR at 198.55 requires attention.

Governance Highlights

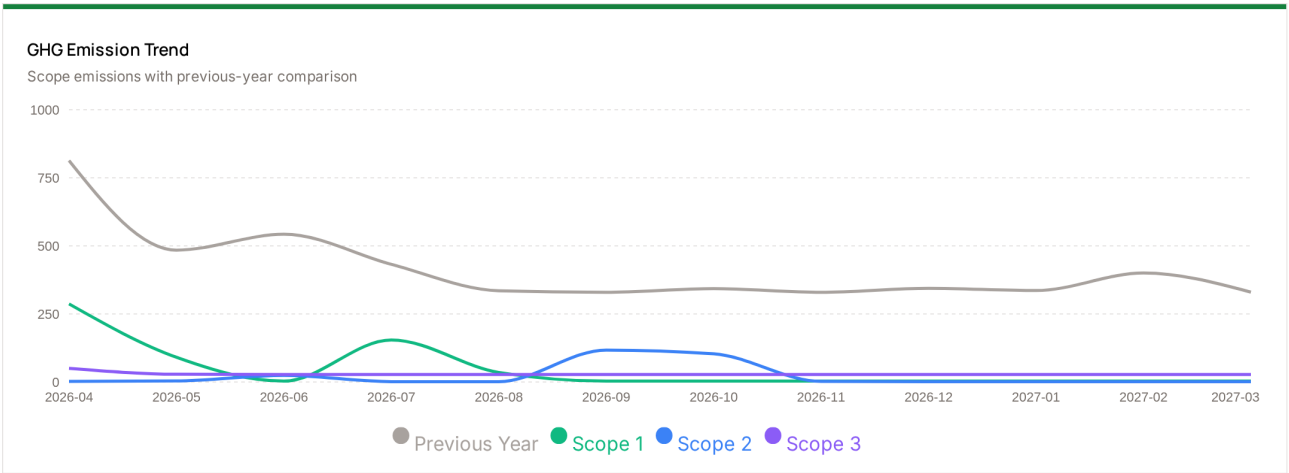
- Average Accounts Payable Days: 353 (may warrant review).

Key Performance Metrics

1,207.04 tCO2e	88.79 %	470	198.55	352.8 days
TOTAL EMISSIONS	RENEWABLE %	EMPLOYEES	LTIFR	AP DAYS

Emissions

Reporting Frequency: Monthly



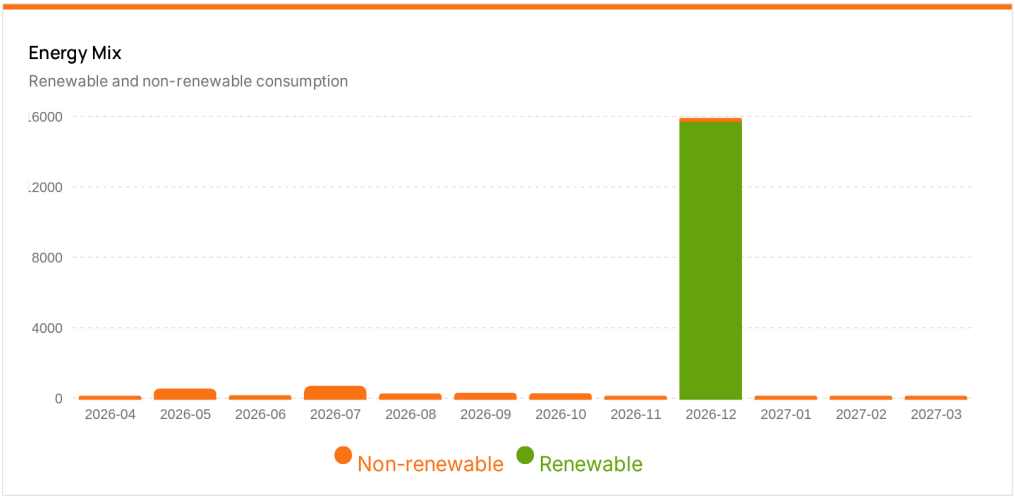
Scope Breakdown

Scope	Emissions (tCO2e)	% Contribution
Scope 1 (Direct)	592.83	49.1%
Scope 2 (Indirect - Energy)	260.9	21.6%
Scope 3 (Value Chain)	353.31	29.3%
Total	**1,207.04**	**100%**

ANALYSIS

Scope 1 emissions represented 49.1% of total emissions during the reporting period, indicating direct emissions are the primary contributor. Scope 2 remained comparatively lower than Scope 1.

Energy



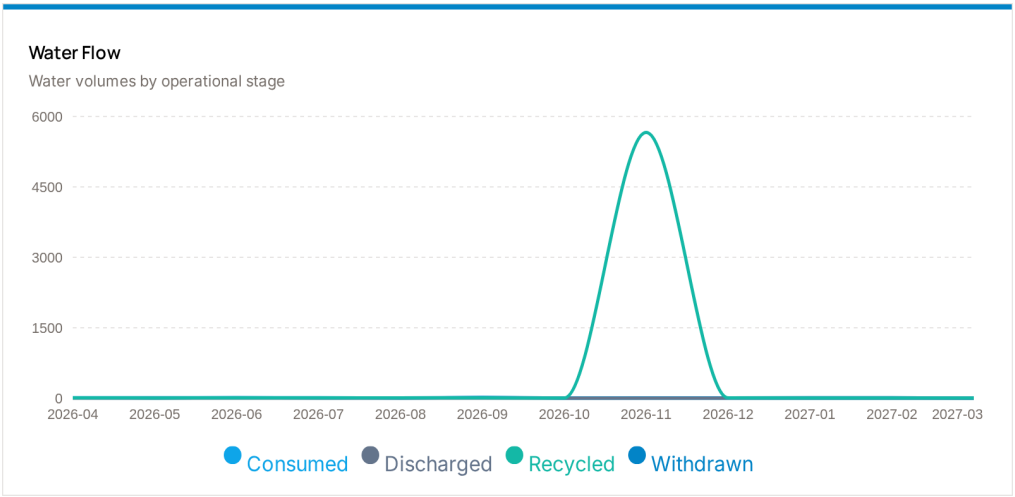
Energy Summary

Metric	Value
Total Energy Consumption	**17,768.67 MWh**
Renewable Energy	88.8%
Non-Renewable Energy	11.2%
Energy Intensity	21.43 MWh/MT

ANALYSIS

Renewable energy accounts for 88.8% of total consumption, demonstrating strong commitment to clean energy transition.

Water



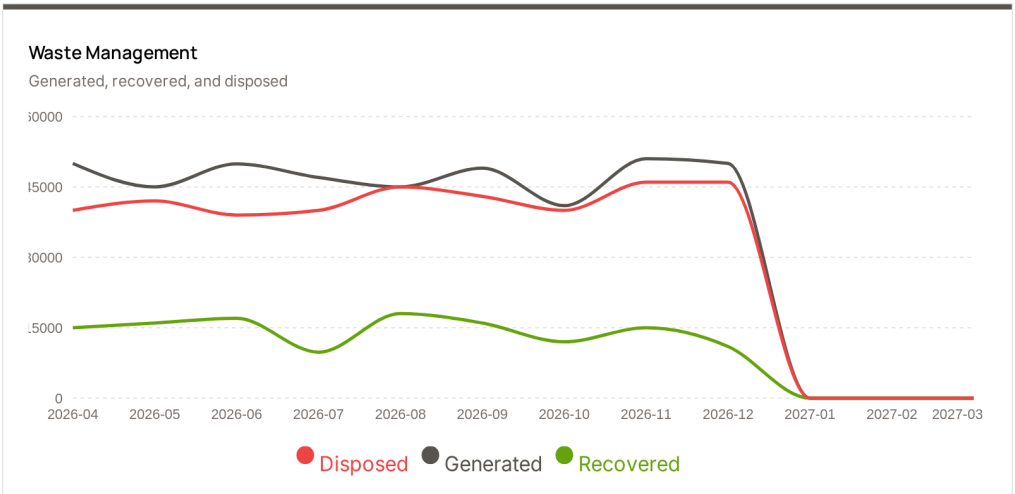
Water Summary

Metric	Value (KL)
Withdrawn	Not Reported
Consumed	Not Reported
Discharged	Not Reported
Recycled	5,720.72
Recycle Rate	Insufficient Data

ANALYSIS

Water recycling data (5,720.72 KL) is available, but withdrawal data is incomplete. Recycle rate cannot be calculated.

Waste



Waste Summary

Metric	Value (MT)
Generated	427,900
Recovered	116,032
Disposed	Not Reported
Recovery Rate	27.1%

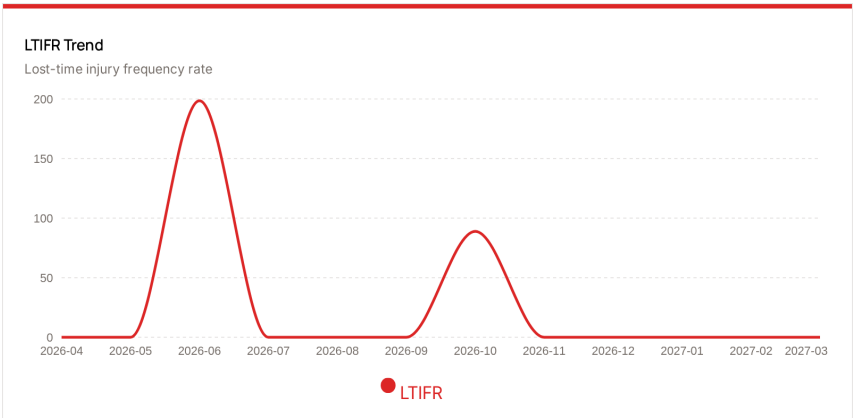
ANALYSIS

Waste recovery exceeded disposal, indicating effective waste management and circular economy practices.

Social

Workforce Overview

Metric	Value
Total Employees	**470**
Female Workforce	0.4%
Employee Turnover	Not Reported
LTIFR	198.55



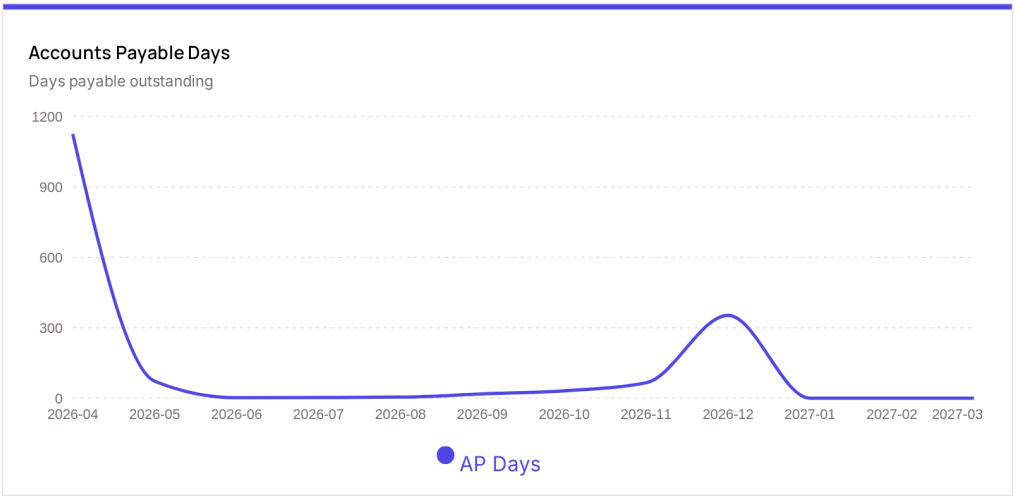
Safety & Compliance

Incident Type	Count
Health & Safety Incidents	17
Data Breaches	6
Compliance Violations	2

ANALYSIS

LTIFR of 198.55 indicates safety improvements may be needed.

Governance



Governance Metrics

Metric	Value
Accounts Payable Days	353 days

ANALYSIS

Accounts Payable Days at 353 exceeds typical benchmarks and may warrant review for supplier relationship management.

Performance Summary

Period-over-period comparison indicators based on available data.

Note: Previous reporting period data is not available.

Trend analysis will be available once multiple reporting periods are completed.

Current Period Values

KPI	Current Value	Target Direction
Total Emissions	**1,207.04 tCO2e**	**Lower is better**
Renewable Energy %	88.8%	Higher is better
Water Recycled	5,720.72 KL	Higher is better
Waste Recovery	116,032 MT	Higher is better
LTIFR	198.55	Lower is better
Employee Turnover	Not Available	Lower is better
AP Days	353 days	Lower is better

Key Insights

Rule-based observations generated from dashboard data.

1. Scope 1 contributes 49.1% of total emissions, making it the primary focus area for emission reduction initiatives.

2. Renewable energy usage exceeds 80% (88.8%), demonstrating industry-leading clean energy adoption.

3. Waste recovery outperformed disposal, indicating successful circular economy practices and waste diversion programs.

4. Water recycling of 5,720.72 KL reported. Complete water withdrawal data needed for rate calculation.

5. Accounts Payable Days exceeds 300 days (353) and may warrant review to maintain healthy supplier relationships.

Appendix

Methodology

KPIs are calculated using data available in SustainRepo based on the selected reporting period. Emissions calculations follow the GHG Protocol. Energy, water, and waste metrics are aggregated from facility-level data.

Reporting Boundary

Parameter	Value
Organization	ORG1
Reporting Period	Apr 2026 - Mar 2027
Reporting Frequency	Monthly
Facilities Included	All facilities
Framework	Internal / BRSR
Report Version	1.0
Generated On	August 3, 2026

Metric Definitions

GHG Intensity
Total GHG emissions (Scope 1+2) divided by production output. Unit: tCO2e per MT.

Renewable Energy %
Percentage of total energy from renewable sources (solar, wind, hydro, biomass).

LTIFR
Lost Time Injury Frequency Rate - injuries per million hours worked.

Waste Recovery
Waste diverted from disposal via recycling, reuse, or recovery methods.

AP Days
Average days to pay suppliers (Days Payable Outstanding).
